CALL FOR ENTRIES

Open to all primary and secondary student photographers

ATOM is proud to present the ATOM Photo Comp 2016. This inaugural photography competition is sponsored by Photography Studies College.

The theme for the competition is 'A Sense of Place'.

Photography allows us to create our own unique interpretations of the world around us. The same place can have a different 'feel' in different situations. As a medium, photography offers many ways to explore a variety of perspectives on a location.

- Choose a location that is interesting or important to you.
- Take 3 original photographs that offer an interpretation of that place.
- Submit your photos, including a short written statement, online.

Be creative with your photography. You can choose a place that has special significance to you, a place that is mysterious or fun, a landscape or a building or anything else you can imagine. Your photographs can be colour or black-and-white, realistic or experimental; they can include people or animals, and be the busiest or quietest place you can find. This is an opportunity to express yourself through your photography; each photograph is a reflection of you.

- All photographs must be taken specifically for the ATOM Photo Comp. All entries must be entered online at atomphotocomp.org.
- There are separate categories for Primary (P–6), Lower Secondary (7–9) and Upper Secondary (10–12).
- The competition is free to enter, and is open to primary and secondary school students in Australia and New Zealand.
- Prizes will be announced soon.

For more information on how to enter, visit atomphotocomp.org/rules/

Enter your photographs now!
